Note

The official titles of all the ISO27k standards (apart from ISO 27799 “Health informatics”) start with “Information technology — Security techniques —” which is derived from the name of ISO/IEC JTC1/SC27, the committee responsible for the standards. However this is a misnomer since, in reality, the ISO27k standards concern *information security* rather than *IT security*. There’s more to it than securing computer systems, networks and data, or indeed ‘cyber’!
